

# Radar Bathroom Lock

## HARDWARE OPTIONS

TECHNICAL SPECIFICATIONS

### Radar Bathroom Lock

This radar lockset provides secure and easy access to disabled toilet facilities through the National Key Scheme (NKS). This complete lockset includes a 6-lever lockcase, lever handle and key.

The 6-lever lockcase allows for external access using an NKS key and features a coin-release mechanism for emergencies, along with a lift-to-lock and push-to-open operation for convenient egress. The radar lock is fully compliant with the Equalities Act 2010 and BS8300 standards, ensuring accessibility and safety.

#### Features

- Left and right handing options.
- Latch head has been tested to 1,000,000 bolt slam operations.
- Antimicrobial coated lever handle to prevent bacterial growth.
- Easily reversed for inward or outward opening doors.
- Coin release in case of emergency.
- Privacy and safety is maintained at all times by the external red/white indicator.
- Meets BS8300 requirements.
